# About Us

SR Vision Enterprises delivers DGMS-compliant, technology-driven safety solutions for mining, construction, ports, and warehouses—enhancing safety, efficiency, and operational excellence even in extreme environments.

## Our Vision

To deliver maximum customer value through reliable and innovative safety solutions.

## Our Mission

To lead in futuristic safety products that set new benchmarks in protection and performance.

## 2 & 3-Point Seat Belt Reminder System

The 2 & 3-Point Seat Belt Reminder System is a robust safety solution specially designed for HEMM vehicles operating in mining and heavy industrial environments, including mining trucks, dumpers, loaders, dozers, and other heavy machinery. The system is fully compatible with both 2-point lap seat belts and 3-point shoulder seat belts, making it suitable for a wide range of vehicle types.

It continuously monitors seat occupancy and seat belt buckle status in real time. If the operator occupies the seat without fastening the seat belt, the system immediately activates multiple warning modes to ensure prompt compliance. These include a loud audible buzzer, a clear human voice alarm in Hindi announcing “*कृपया सीट बेल्ट पहनिए*”, and a visual indication on the display or indicator panel.

Engineered for harsh mining conditions, the system is designed to withstand vibration, dust, and extreme operating environments. By actively reminding operators to wear seat belts, it significantly reduces the risk of injury during sudden movements, collisions, or rollovers. The

Seat Belt Reminder System helps enforce mine safety regulations, improves operator discipline, and enhances overall workplace safety, making it an essential safety feature for heavy-duty and mining applications.

# Specification's

## 3 Point Seat Belt

|                   |                               |
|-------------------|-------------------------------|
| Operating Voltage | Dual Voltage: 12 / 24 VDC     |
| TYPE              | 3 Point Safety Belt           |
| Material          | Polyster+45#steel+ABS         |
| Size              | Universal                     |
| Application       | Truck, Forklift, Bus and etc. |

## 2 Point Seat Belt
